

Dispenses just-in-time color, in just the right amount, just steps away from your press.

With an AccuBlend™ dispenser on your floor, you'll never have to wait for spot color deliveries. You'll never have to delay jobs waiting for ink. Because with an AccuBlend dispenser, you can make the exact spot color you need any hour of the day, any day of the year.

AccuBlend-HV™ for offset litho inks

Using mixing bases provided by your ink supplier, AccuBlend-HV can produce highly-viscous spot colors for conventional offset, dry offset, UV offset and metal decorating inks.

Its EcoFlow™ cartridges are filled by your ink supplier giving you the ability to make any color. Accommodating up to 18 cartridges, it gives you flexibility by having up to six extra slots for those bases you use most often.

Eliminate waste by making just what you need

When you need a large batch of spot color, don't play it safe and over order. Order less and make up the rest of what you need to finish the job with an AccuBlend-dispensed perfect color match.

Achieve amazing color accuracy

For brand owners there's no room for error when it comes to matching color, and AccuBlend lets you meet that demand with dead-on spot color accuracy down to +/- 0.001 per pound (0.5 gr) for every component that goes into the color.

Turn your old inventory into new ink

With AccuBlend's unique software, you can take all that old ink inventory sitting on your shelves, blend it into new spot colors and you can recapture the value of it.

Keep your presses rolling and your clients happy

With immediate access to spot color you can schedule more rush jobs. And when clients want to alter color during press checks, AccuBlend can help you accommodate those requests in minutes.

Get maximum results with minimal training

GFI's touch screen driven software, COLORBOOK™ makes functions easy and intuitive to use. If you can use a smartphone, you can use AccuBlend.

AccuBLEND™ HV
